SUBJECT: 2018-19 Open Space Committee Dear Dear

Dear Charles Sprenger,

I would sincerely appreciate your participation on the Open Space Committee (OSC) for its 2018-19 term. The committee charge is attached. The OSC advises the Campus/Community Planning Committee (C/CPC) and endeavors to improve campus open spaces with attention towards sustainability.

This year's committee will be co-chaired by Professor Charles Sprenger, Rady School of Management and Chair of the Committee on Campus and Community Environment (CCCE) and Professor Rand Steiger, Academic Senate Representative from the Department of Music and Vice Chair of CCCE. Todd Pitman, Campus Landscape Architect/Assistant Director, will serve as Executive to the Committee and Matthew McCreary will serve as Recording Coordinator.

Resource Management and Planning	Todd Pitman - Executive to the Committee	Campus Planning, Assistant Director	Indefinite	CURRENT
Resource Management and Planning	Matthew McCreary Recording Coordinator	Associate Planner	Indefinite	CURRENT
CCCE	Charles Sprenger	Faculty Representative	9.30.19	CURRENT

2016/17 OPEN SPACE COMMITTEE (OSC)

The OSC is a subcommittee to the Campus/Community Planning Committee (C/CPC) to provide counsel and recommendations with respect to open space planning and landscape design. Open space planning includes the advocacy and oversight of all campus open spaces including the UCSD Park area as defined by the 1989 Master Plan Study. In this capacity the Committee will guide efforts to ensure the development of a holistic system of open space that is attractive, functional and sustainable, and provides for a unifying foundation to the campus architecture and community. The Senior Landscape Planner in the Physical Planning Office serves as an ex-officio Executive to the Committee.

The Committee will perform the following specific functions:

1. Review, prioritize and advocate for open space projects as they pertain to the development and redevelopment of the campus. This includes specific review of the landscape design for all built projects as well as review of major landscape projects.
2. Review with respect to long range open space planning issues and open space planning studies, including how planned open spaces can foster interconnections and help the campus meet sustainability goals.
3. Review and update commemoratives policy and open space planning studies to maximize opportunities for outside contribution towards the installation and maintenance of campus landscape.

Summary notes of each meeting and a record of any Committee recommendations will be kept and distributed to all interested parties.

The Executive to the Committee performs the following functions:

1. Works closely with the co-chairs for all duties associated with Committee meetings, agendas and presentations; serves as the liaison for the Committee with other campus administrative areas, including the rotating chairs for the academic areas.
2. Provides a point of contact for campus landscape projects and outside consultants to assist in meeting set campus open space planning goals.
3. Coordinates comments to the C/CPC regarding landscape design associated with campus building projects and all projects in or adjacent to the Park.
